

SNOWBOARDS WINTER 2025/2026

THE BAKERY SNOWBOARDS

We are three friends who have known each other for a long time. Because of our passion for board sports and craftsmanship we started to build our own snowboards in 2014. Through endless night shifts, hard work and quite a few beers it evolved into a full-fledged snowboard factory.

We're driven by the desire to build progressive high-end boards that are handcrafted to highest quality standards while combining unique designs. We use only the best and most sustainable materials that we can find on planet earth in order to push the quality and eco-friendliness of our boards as far as possible. This goal has been and will always be the ambition behind all of our future technical developments. Every board is 100% handcrafted and the manufacturing process in Munich is still operated by us ourselves.

Hopefully, we can share our joy for snowboarding and craftsmanship through our products and if you ever happen to come to Munich, you are more than welcome to stop by our factory and visit us.

OUR BOARD DNA

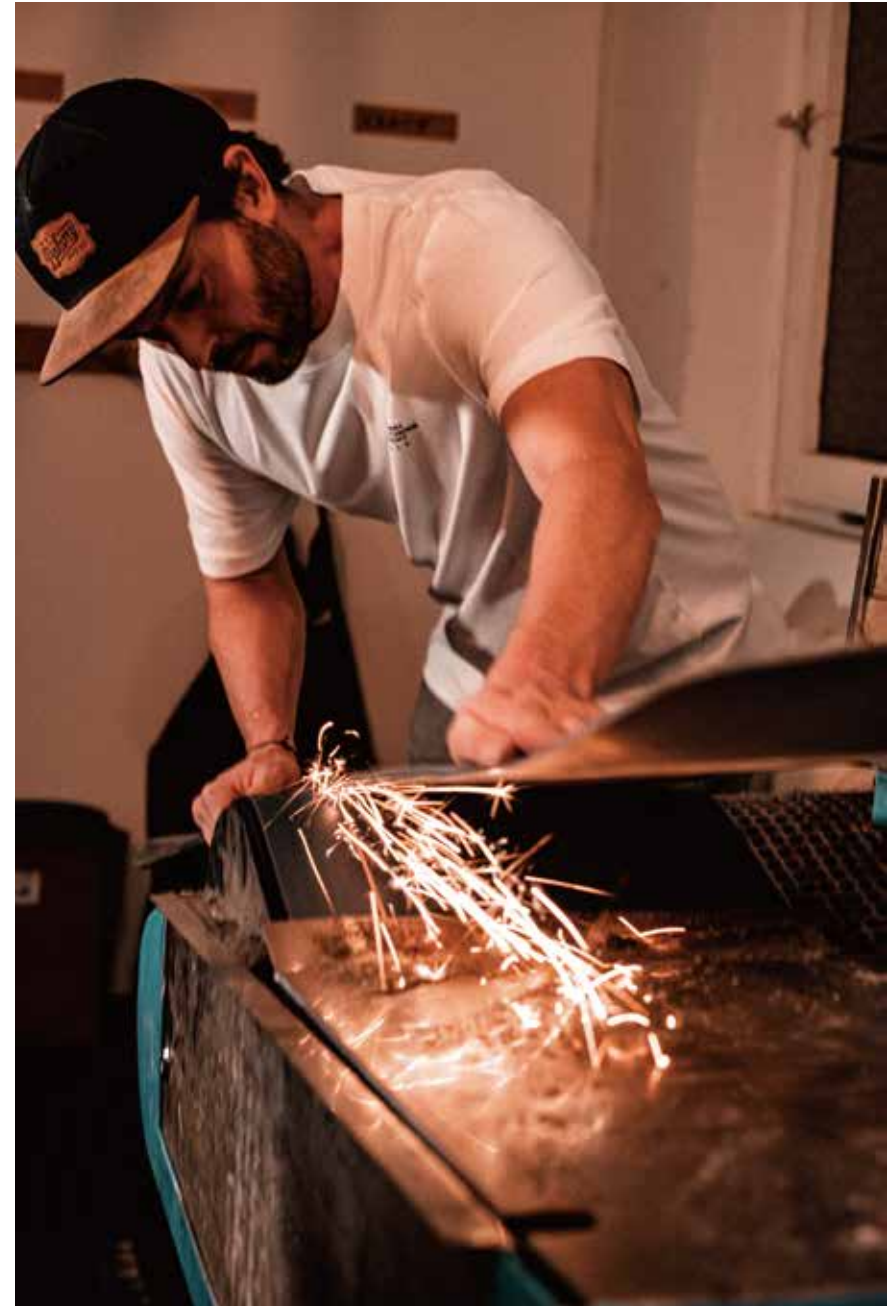

At the heart of every snowboard is the core. We only use a tip to tail full bamboo core. Using bamboo as core material results in boards with crazy pop and liveliness. Since there are over 1,500 species of bamboo worldwide, you can imagine that it took us quite some time and intense research to figure out the best type for our cores. Our bamboo is grown in the Zhejiang province of mainland China and our supplier works directly with small family farmers who grow and harvest the bamboo. The plant's incredible speed of growth and its exceptional carbon storage properties make bamboo a prime product for sustainable forestry and therefore results in an extremely low overall carbon footprint, even taking into account the overseas shipment from China.

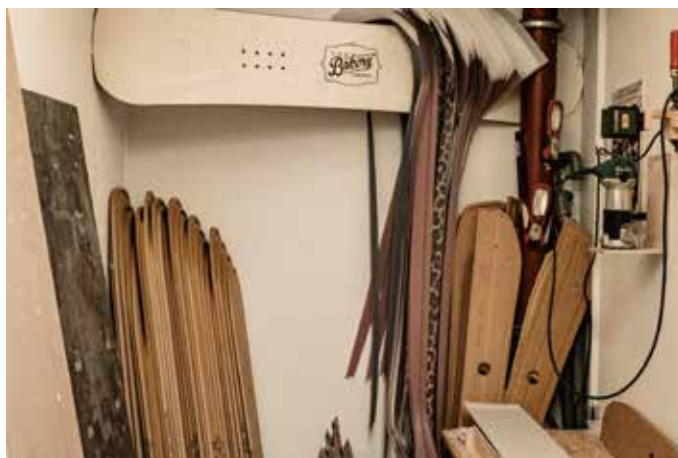

The epoxy resin is what makes your board hold together in its inmost folds. We exclusively use a resin which is designed specifically for high performance applications. Furthermore, a high fraction of its molecular structure is derived from plant origin instead of conventional petroleum based epoxy.

Our topsheet and base are sourced from the global market leader in this segment based in Austria. The 8210 topsheet is their topnotch product for snowboards and presents excellent abrasion resistance and UV stability.

We only use a high-end sintered base which provides great wax absorption properties and outstanding durability against those nasty rocks.

To guarantee the best quality without compromises, all boards are crafted in our factory in Munich, Germany. All boards will be delivered with a spec and a certification sticker.

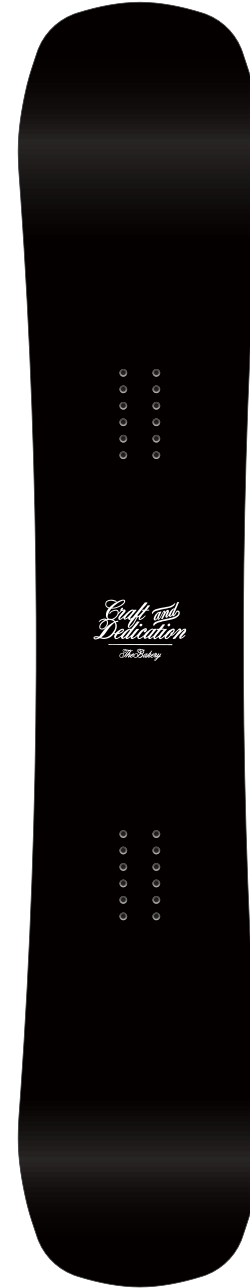

HORST

HORST LOVES TO PLAY! WHETHER YOU TAKE HIM ON A RIDE TO THE PARK, HIT SOME SIDE FEATURES OR SIMPLY WANT TO CRUISE DOWN THE SLOPE - THIS BOARD GUARANTEES PURE FUN. A SOFT FLEX AND HYBRID CAMBER MAKE THE BOARD PLAYFUL WHILE ITS FULL BAMBOO CORE GIVES POP AND STABILITY. THIS IS YOUR PERFECT CHOICE FOR SERIOUS JIBBING OR FOR AN ENTRY LEVEL ALL-ROUND BOARD.

GOOD TIMES

CRAFT & DEDICATION

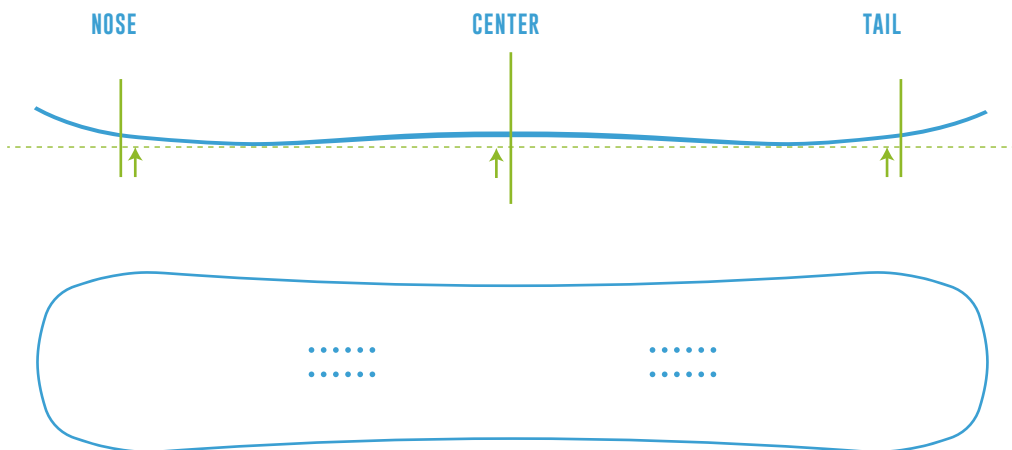

HIGHSCORE

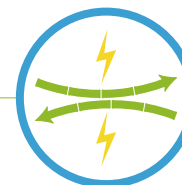

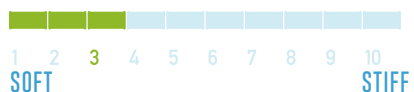

THE BAKERY SNOWBOARDS - HORST

TRUE TWIN - HYBRID CAMBER

Combining the best of both worlds results in a camber that is centered in the middle and blends into a rocker profile at nose and tail. A good option for demanding all-round riders.

PATHMAKER

OPEN TERRAIN OR TIGHT TREE RUNS. THE BACKCOUNTRY IS WHERE THE PATHMAKER FEELS AT HOME. ITS MASSIVE SHOVEL AND ROCKER IN THE FRONT AREA GIVE THE NECESSARY FLOAT, WHILE ITS SET BACK STANCE AND SHORT TAIL YIELD AN AGILITY THAT YOU WOULDN'T EXPECT FROM SUCH A LENGTH. THE CAMBER UNDER THE BACK FOOT PROVIDES MAXIMAL CONTROL AND THE BOARD IS A REAL BEAST CARVING DOWN THE MOUNTAIN – EVEN IF THERE IS NO POW!

PATHMAKER SPLITBOARD

INTO THE WILD. WANT TO TAKE OUR CLASSIC BACKCOUNTRY BOARD OFF-THE-GRID? THEN YOU WILL LOVE THE PATHMAKER SPLIT. ITS LENGTH, THE MASSIVE SHOVEL AND THE SETBACK STANCE WILL GUIDE YOU THROUGH NO MATTER HOW DEEP IT IS. THE SHORT TAIL AND CAMBER UNDER THE BACK FOOT WILL INITIATE YOUR TURNS WITH UNKNOWN EASE. TIME TO CHOP THE TREE RUNS!

MFG
